# Connecting phone to camera

## A. connecting to WIFI

1. Open smartgate APP, enter email or phone number and password
2. Plug transformer to electrical outlet, press reset button located on the back side of transformer for 8 seconds
3. Click Setting on your phone, then turn on Wi-Fi, search and click the signal that starts with "SmartDoor"
4. Go to Smartgate APP, click plus button on the right upper corner
5. Search starts automatically, camera CID number will appear shortly
6. Create camera name, or "My Device" by default
7. Enter WIFI name and password then press enter

Video Screen appears (to prevent mismatch, do not click video screen when it is connecting)

"connected" appears when complete, check live video to ensure correct camera is linked

Follow WIFI sync procedure for cable network (green light stays solid when cable is successfully connected to the device)

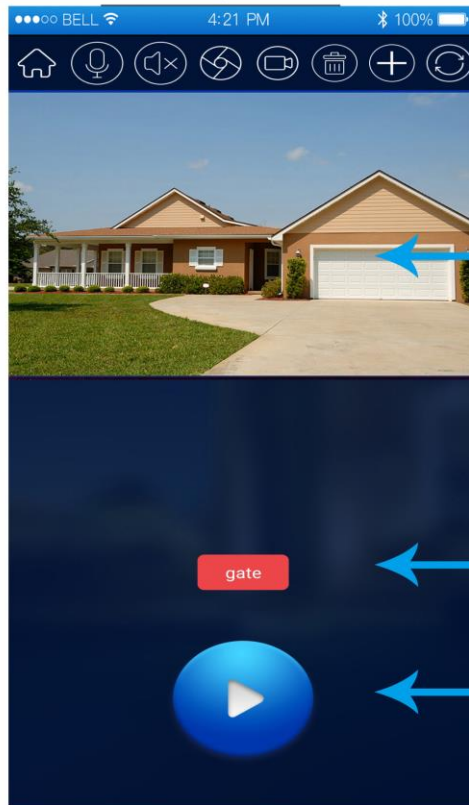

## **To sync camera and receiver**

1. Press learning button on cm control or cm receiver, make sure the light is solid red
2. Sign in the smartgate APP, click on the camera
3. Press open button, until gate is moving
4. Connection is complete (Note: receiver's frequency is 418mhz)
